

Scrum-Theorie Spickzettel

Gruppe 1

Scrum

- **Scrum Definition**

- Lightweight framework -> generate value through adaptive solutions for com. problems
- PO = PB // SC -> Sprint = In. // SC+SH adjust
- Simple; purposefully incomplete; guide relationships & interactions

- **Theory**

- Empiricism and lean thinking
- Optimize predictability / control risk
- Containing four events = sprint <- transparency, inspection, adaption

- **Transparency**

- Visible for everyone; decisions -> 3 artifacts
- Transparency enables inspection

- **Inspection**

- Frequently & diligently -> undesirable problems (5 Events) = adaption

- **Adaption**

- Outside limits = ASAP Adaption <- difficult if not empowered or self-managing

- **Scrum Values**

- Commitment, Focus, Openness, Respect, and Courage
